

Attachmate® EXTRA! X-treme

6530 Client Option v9

Further extend EXTRA!® multi-host connectivity to incorporate Tandem system access

Today's IT climate in most major organizations is characterized by change and increasing complexity. Often, the information needed to conduct daily business practices is scattered across numerous disparate host, network, and desktop systems. Managing multiple information resources can be overwhelming at times, as it may involve several solution vendors to do so. This only adds to the complexity and can cause costs to spiral out of control.

Attachmate EXTRA! X-treme 6530 Client Option simplifies and streamlines multi-host connectivity by further extending the reach of EXTRA!® multi-host connectivity to incorporate Tandem system access.

Benefit from an array of productivity features

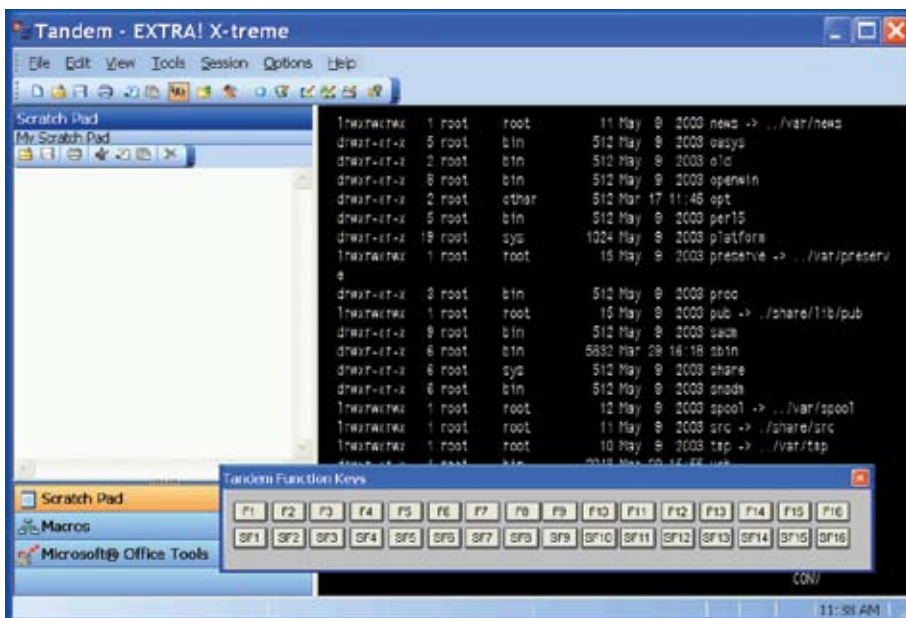

With its Microsoft® Windows® look and feel, EXTRA! software displays the same colors and toolbar icons that are familiar to Microsoft Office users, eliminating the need for additional training. EXTRA! software brings emulation to a whole new level with its advanced productivity feature set that includes a built-in Macro Launcher, Scratch Pad, and integration with Microsoft Office applications. Users can create mail messages, notes, tasks, and appointments—or even launch Microsoft Word directly from within their emulation session window.

Using the fully integrated Scratch Pad, users can take notes as they work within their host applications, making it ideal for customer service-centric

KEY BENEFITS

Leverage valuable Tandem host information assets while cutting complexity and cost.

- Enhanced SSH and SSL support
- Improved connection speeds
- Improved copy to clipboard functionality

QuickPads, Macro Launcher, Scratch Pad, Microsoft Office tools, and many other productivity features are conveniently at your fingertips with EXTRA! X-treme 6530 Client Option.

organizations. Call center employees often handle many calls in a short period of time, and do the cleanup work—such as interacting with the host and documenting the call—at a later time. By providing a Scratch Pad area alongside the host application itself, call center employees can easily maintain correlation between their notes and the application they are working with. This improves service, reduces errors, and ensures that imperative information is captured and saved as needed.

Other productivity features offered by EXTRA! X-treme 6530 Client Option include document integration, intelligent navigation, bookmarks, and customizable QuickPads. Only EXTRA! software offers so many ways to eliminate redundant keystrokes, automate workflow, and streamline complex tasks. EXTRA! software accelerates data entry and host navigation like no other emulator can.

Integrate full-featured emulation within a corporate portal or web page

Unlike other emulators on the market, EXTRA! 6530 Client Option fully supports web and portal integration. Only EXTRA! software allows users to exploit all the features and functionality of a traditional thick client emulator within a portal framework. The ability to launch and run EXTRA! sessions from within a portal ensures that critical host applications are conveniently available to users when and where they need them. When inside the portal frame, EXTRA! sessions can be maximized or minimized within the frame, allowing users to work with several applications at once.

With portal support, organizations can take the first step in moving current users toward a web-based or remodeled application, without impacting productivity. EXTRA! software protects organizations from incurring new costs or requiring additional training for users. Simply put, no other desktop emulator can offer the same conveniences.

Extend Tandem reliability to your desktops

Tandem hosts have long been heralded for their 100% uptime, which explains why they house the mission-critical information and applications that help run a multitude of organizations including financial institutions, telecommunications businesses, and government agencies. EXTRA! X-treme 6530 Client Option offers that same reliability for full-featured, mission-critical access.

About Attachmate

Attachmate, owned by an investment group led by Francisco Partners, Golden Gate Capital and Thoma Cressey Equity Partners, enables IT organizations to extend mission critical services and assure they are managed, secure, and compliant. Attachmate's leading solutions include host connectivity, systems and security management, and PC lifecycle management. Our goal is to empower IT organizations to deliver trusted applications, manage services levels, and ensure compliance by leveraging knowledge, automation, and secured connectivity. SYSTEM REQUIREMENTS

Client operating system support

- Windows Vista
- Windows XP
- Windows 2000

Enterprise host system support

- Tandem

Supported emulation

- 6530

Productivity features:

- Macro Launcher
- Scratch Pad
- Microsoft Office integration
- QuickPad
- Intelligent navigation/bookmarks
- FTP file transfer support
- IXF file transfer support
- Macro Record/Edit
- Screen print
- Copy/paste
